About A19

Artisan Manufacturing

A19 is fueled by inspiration – inspiration that is reflected in every aspect of our work. When you purchase an A19 product, we invite you to share in the passion and inspiration of our artists – and the company – that create superior one-of-a-kind pieces of art.

We go to great lengths to ensure that each ceramic and glass lighting fixture carries our distinct signature of quality. A19 successfully blends innovative vision with the traditions of gifted artisans.

The name "A19" is a bit of a tongue-in-cheek reference to your standard household light bulb. But, as you'll discover, we're a company that is anything but ordinary.

All our products – from beginning to end – are made by hand in Southern California. Our wall sconces and pendants are designed, molded, fired, sanded, finished, assembled and shipped directly from our studio.

Just as important, we work hard to ensure consistent quality and guarantee your 100% satisfaction.

The A19 Story

Like many creative and successful businesses, the idea for A19 began on the back of a cocktail napkin. Owner Cinnamon Alvarez and a friend sat down at a local watering hole and dreamily hatched their plans to run their own shows. They'd do what they really loved and inspired them. They'd treat their employees like family. They'd make their own hours. They'd never work weekends and they'd take long vacations. They'd change the world! (Okay, maybe they'd just make a difference.)

At the start of the next workweek, Cinnamon sat down with her boss, looked him square in the eye and launched into her jaw-dropping proposal: She either wanted to purchase the company or start one of her own. To her surprise, he thought it was a great idea and encouraged her to explore purchasing the business.

Flash forward to a couple of months later. Reality soon set in; crunching numbers and creating a business plan made it clear there was much more to this entrepreneur thing than vision and determination. Cinnamon needed support – and lots of it. So her ex-boss became her mentor; she then approached key co-workers – each an exceptionally talented craftsperson – to see if they were passionate enough to make a go at starting a new company. And A19 was born.

That was 1998, and the drive to create the highest quality handmade lighting fixtures, to provide attention and service unparalleled in any business, is a continuing success.

Committed to the Community – and the Environment

A19 is much more than a lighting company. Woman-owned and operated in a close family-style environment, we respect the impact our business has on the social and physical environment. We source our materials as locally as possible to help build employment in the region, minimize fuel usage, and minimize our production lead times.

We continue to develop ways to make our manufacturing energy efficient without compromising product quality. The clay bodies and glazes that we use do not contain any material in sufficient quantity to be toxic or to constitute a chronic health hazard and they require less energy to create our durable, long-lasting fixtures.

Besides reclaiming nearly every speck of clay, every shard of glass, and every drop of water involved in manufacturing, we use recycled boxes, bubble wrap and office materials.

Our ceramic fixture bodies naturally prevent undesirable glare and excessive light exposure. Our ceramic downlights further reduce outdoor light pollution, light trespass and skyglow to preserve the night skies and sensitive ecosystems.

Endless Possibilities

Finish: While our handmade ceramic fixtures are beautiful as is, with A19 you can customize the finish. Go for bare bisque, paint them yourself, choose an A19 signature finish, or provide a paint brand color code and sheen—and consider it done!

Size: Many of our fixtures come in multiple sizes. Look for this icon by the fixture and see the range of sizes in the information table below.

Style: We have designed a wide range of styles that will fit into any decor from art deco, coastal, contemporary, eclectic, industrial, rustic, traditional to modern. Even better, our finish options allow us to match your design scheme perfectly.

Frequently Asked Questions

What is A19?

A19 is a woman-owned and operated ceramic lighting manufacturing company based in Ontario, California. While our name comes from the common household light bulb, our business is unique. Our pride in ownership can be seen in each hand-crafted fixture, as is our dedication to your total satisfaction. We enjoy being a part of every aspect of the business – from creating original designs to delivering those fixtures to you.

Is every fixture from A19 truly handmade in the United States?

Yes. Every ceramic pendant and wall sconce is designed, molded, fired, sanded, finished, assembled and shipped from our Southern California studio.

Can I customize my fixtures?

Absolutely. We offer endlass finish options in addition to configurations for different bulb types and locations. If you're unsure which options to choose, contact us and we can help. We have color swatches available upon request and we can color match to virtually any color.

Why ceramic?

Ceramic fixtures are versatile and very durable. Our bare bisque fixtures are smooth and easy to paint allowing your fixtures to be any color. Because ceramic is resistant to rust and corrosion, A19's ceramic wall sconces and pendants will outlast comparable metal lighting fixtures. Ceramic is opaque which conceals view of the bulb and eliminates harsh glare. Ceramic is also a good insulator improving safety.

What lamping options are available?

Most of our standard fixtures are made with E26 medium base sockets or E12 candelabra base sockets and accept a variety of common bubs. For projects that require energy efficient lamps be provided with the fixture, we offer a GU24 base socket with Energy Star LED bulb. Bulbs are also provided for those fixtures best lit with specialty lamps. Contact us for special requests.

Are A19 fixtures ADA compliant?

A19 fixtures with a depth of 4-inches or less meet the projection requirements set forth by the Americans with Disability Act (ADA). You may only be concerned about ADA if you're selecting fixtures for a public space.

How do I order fixtures?

Once you have chosen your favorite fixture that suits your needs, specify the item number, option(s) and finish as in the following example: 208-WET-A31. If you have any questions, please call us at (800) 664-4204 or email sales@a19.com. We love to help.

Can I purchase A19 products directly from the studio?

A19 products are sold exclusively through a network of independent lighting showrooms and authorized dealers. If you are in the business of specifying and selling lighting and are interested in offering A19 products, please contact us or complete our dealer application at https://a19.com/dealer.

Can I paint my fixtures?

Yes. If you would like to paint your fixtures, choose any style from the Islands of Light Collection without specifying a finish. While bisque is beautiful and completely usable in its natural bare state, you may easily paint bisque with any latex or acrylic paint. No primer is necessary unless you are using an oil-based paint. Care and maintenance instructions are included with each fixture.

How long are A19 products warranted?

A19 warrants all products to be free of defect, both material, and workmanship, within one (1) year of the purchase date to the original purchaser. All A19 products are manufactured to the most stringent quality-control standards possible. Bulbs are not eligible for replacement. Should you have any concerns about our fixtures, please do not hesitate to contact us. We are eager to assure you are happy.

How do A19's fixtures help reduce light pollution?

A19 offers fully shielded downlights that direct all light downward to minimize sky glow, glare, light trespass. To reduce the amount of blue light, use warm color temperature bulbs (no more than 3000K). For beachfront property, red or amber toned turtle friendly bulbs are recommended.

What are A19's green policies?

We believe strongly in being stewards of our environment. That is why we recycle the clay we use to create the lighting fixtures, filter the water we use before it leaves our factory, and use recycled boxes, bubble wrap, and office materials.

The Nature Collection

"One touch of nature makes the whole world kin." Those words of William Shakespeare bring us together hundreds of years later, and A19's Nature Collection serves to bring the 21st century and the natural world together in one dynamic collection.

Handcrafted, of course

Made of high-quality ceramics and decorated with stunning faux finishes, these hand-molded wall sconces and pendants were created to resemble all the colors, textures and designs you find in nature. The advantages of ceramic over the real natural material is that while the fixture may look like bamboo or wood, it is substantially more durable.

Remarkably weather-resistant

A19's ceramic fixtures have an advantage over other natural products. Ceramic is incredibly weather-resistant and won't rust, corrode, or decay over time.

Item # N20301-NA Bamboo Wall Sconce Natural

Options galore

A19's Nature Collection offers options for both damp and wet environments, as well as Energy Star rated LED and ADA-compliant fixtures. Additionally, all of our pendants come with your choice of a black or white canopy and seven feet of matching cord that can be cut to your preferred length.

If you're looking for an alternate color combination or have an idea, you don't see, please give us a call at (800) 664-4204. We'll work with you to create just the right fixture.

How to Order

To order any wall sconce or pendant from the Nature Collection, simply choose the item number for the style you prefer and add the code of any desired option(s).

Damp or Wet

A19's standard light fixtures are cULus listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp." Wet locations are unsheltered outdoor areas that are exposed to direct contact with rain and require fixtures to be ordered with an "outdoor/wet location" option.

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

The Studio Collection

This fresh, modern collection can add an unexpected spark to a traditional setting or create visual punch to a contemporary interior. These mini-pendants offer abundant light, as well as a wide variety of hand-applied finishes and glazes that make any public or private space seem magical.

Specialized design

From the hippest sushi bars to chic kitchen islands, the sky's the limit with Studio Collection's ever-evolving collection of pendants. Spotlight a cozy, romantic nook or dramatically transform an entire space with these bold, contemporary pendants.

Line-voltage and Low-voltage Options

Line-voltage mini-pendants offer versatility and convenience. They are shown in natural bare bisque, but don't stop there. You have the ability to choose from endless finish options including specifing any designer color. Line-voltage is the standard voltage—120 volts—supplied in the United States and Canada and does not require a transformer to operate.

A favorite for interior designers, low-voltage mini-pendants bring a pop of color, texture, and sophistication to modern and contemporary spaces. Each 12V mini-pendant includes everything needed for installation. Just grab an electrician and go!

Item # MP02-A31-BCC Realm Mini Pendant in Satin White with Black Cord & Canopy

Pendants that enhance the beauty of any room

Any one of our finishes can elevate the beauty of our mini-pendants. Choose a finish that blends seamlessly with your décor or an eye-catching one that makes your space pop. Take a look at the variety of glazes, colors and faux finishes beginning on page 62.

How to order

To order any pendant from the Studio Collection, specify the item number, option(s) and finish. Changing the finish of a particular style can create a completely different look. Just change the last two digits of the item number to the color code for the finish of your choice.

Line-voltage Cord and Canopy

Line-voltage versions of our mini-pendants include 6 feet of cuttable black cord, a matching black canopy, and a GU10 base LED bulb.

Canopy Size:
5.25" W x 1.5" H

Low-voltage Cord and Canopy

Each low-voltage mini-pendant includes a brushed nickel mono-point dome canopy with an integrated 12V electronic transformer, 6-foot adjustable coaxial cable socket set, hang-straight sleeve, QDF Quick Jack connector, and MR16 bulb.

Mono-point
Canopy Size:
4.5" W x 1.75" H

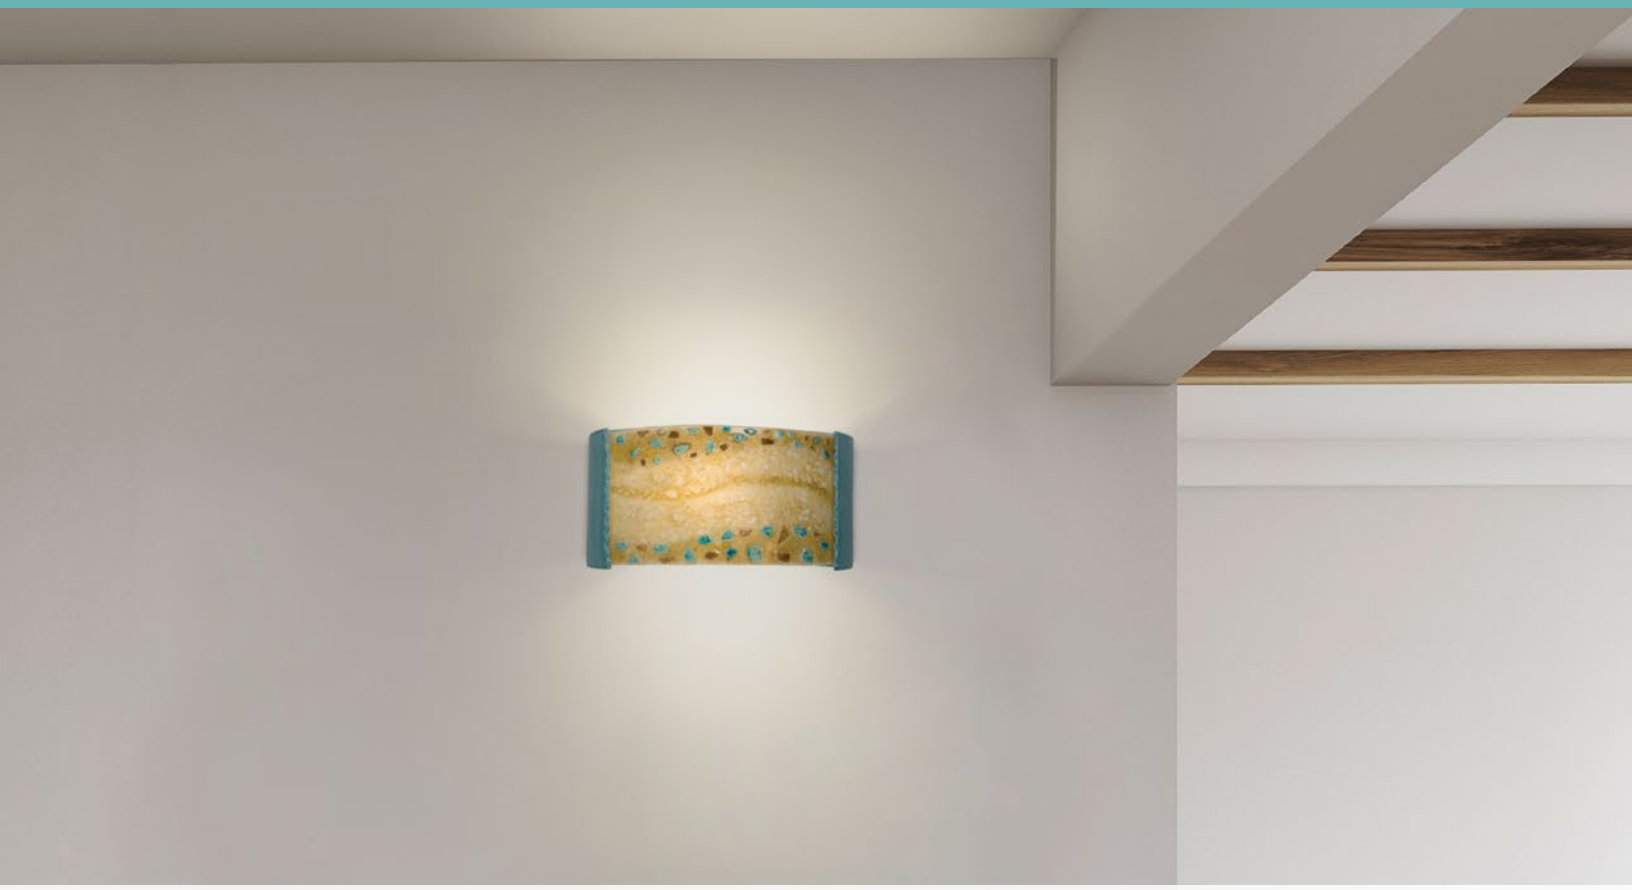
The reFusion Collection



Recycled fused glass takes lighting to the next level by creating a stunning array of textures, colors, and patterns that have an organic, natural feel—including bubbles, speckles, and crackles. It's something you won't find anywhere else but from A19.

But beautiful doesn't mean these fused-glass pieces aren't as sturdy and functional as our other fixtures. Each piece in the reFusion Collection is hand-made to A19's exacting standards. Their ceramic bases ensure that use in a damp location, such as a bathroom, won't harm the fixture. Additionally, we also offer incandescent and Energy Star rated LED options to meet any needs, and many of our sconces also meet American with Disabilities Act (ADA) requirements by having a depth of four inches or less.

Where hand-crafted design meets "green"

Our reFusion Collection turns recycled glass into long-lasting, stunning, functional pieces of art that will be admired and appreciated for generations to come.

We invite you to take a look at the range of unique styles we have to offer.

Item # RE108-TC-MAB Ebb and Flow Wall Sconce Teal Crackle and Multi Amber

How to order

To order any wall sconce from the reFusion Collection, simply choose the item number for the style you prefer.

For energy efficiency, choose our Energy Star rated LED and add the code LEDGU24 to the item number.

Damp or Wet

A19's standard light fixtures are cULus listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp."

Wet locations are unsheltered outdoor areas that are exposed to direct contact with rain and require fixtures to be ordered with an "outdoor/wet location" option.

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

Options legend (add code for desired option to fixture item #)

LAMPING OPTIONS	CODE	DESCRIPTION
Standard		E12 base, 60W max; LED, CFL and Halogen compatible (Bulb not included).
LED	**LEDGU24**	GU24 base, 11W Dimmable Energy Star LED (Bulb not included).
Outdoor / Wet Location	**WET**	E26 base, Outdoor Sheltered Socket for Wet Locations (Suitable for rainy locations and open top fixtures. Use WET rated bulb) (Bulb not included).
	WETST-LEDGU24	Sealed Top for Wet Location; GU24 base, 11W Dimmable Energy Star LED (Bulb included).

Exclusive fused recycled glass and ceramic wall sconces

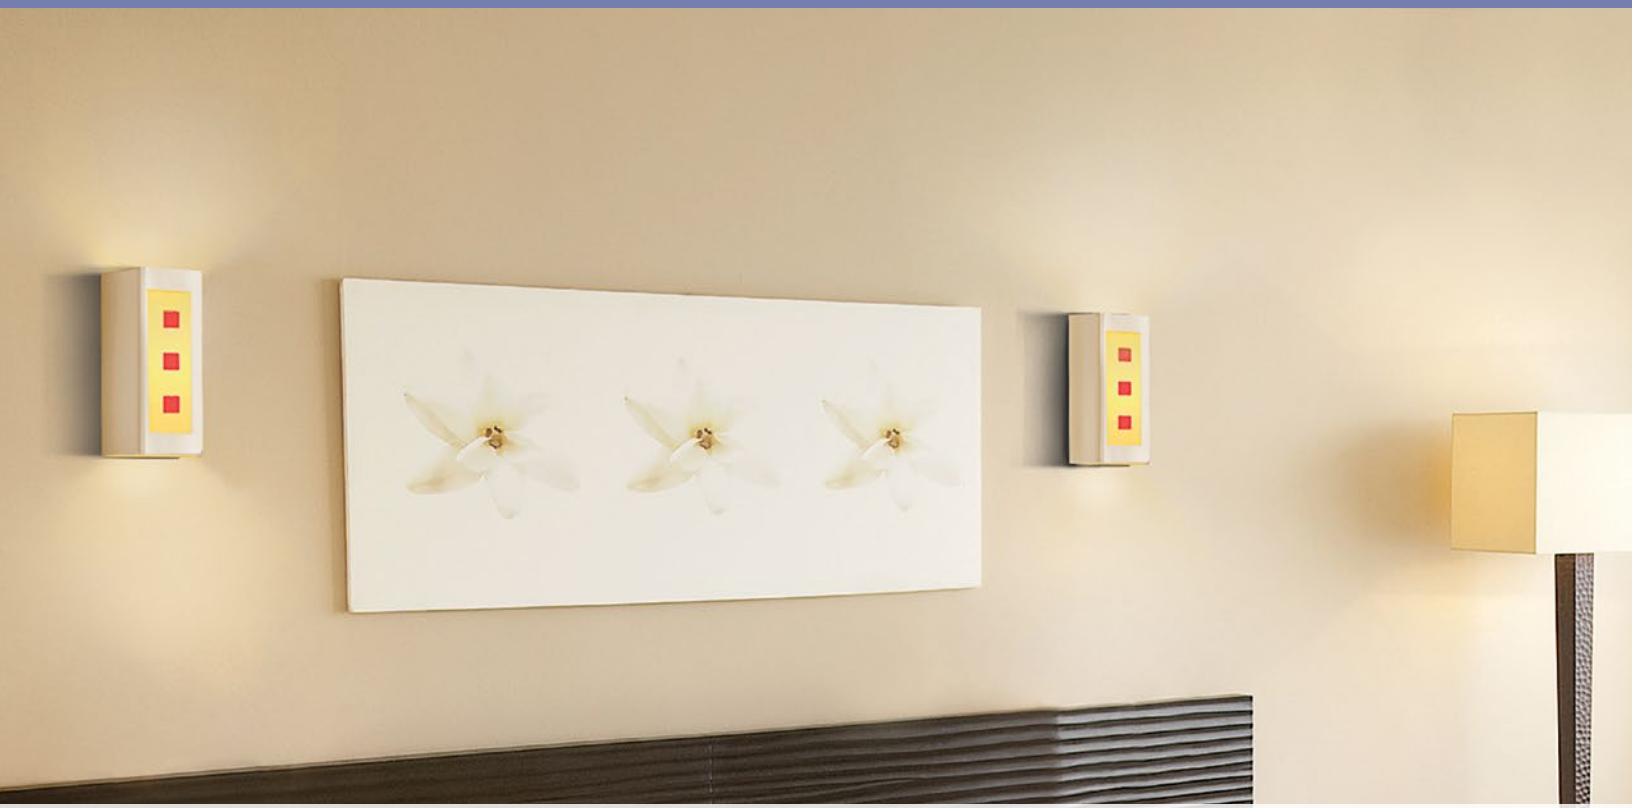
Item # RE120-SS-MAB Lava Wall Sconce Sandstorm and Multi Amber

The Jewel Collection



Like precious gemstones, A19's Jewel collection sparkles with color and life. Some subtle, some bold, each fused glass design is as distinctive as the individuals who enjoy them.

Created using a unique fused glass process

We incorporate a special fused glass process in the kiln to bond the art glass together. The fused glass is then carefully mounted on a ceramic frame, which is hand slip cast, fired in A19's kilns and finished in satin white to set off the dynamic colors. Each light fixture is truly a work of art.

Art that's made to last

The value of A19's Jewel Collection extends far beyond their beauty. These wall sconces were designed to showcase the unique art glass as well as provide ambient up and down light effects. Energy Star LED options, as well as more shallow ADA-compliant sconces are available for commercial applications.

There will be subtle variations and each piece is a one-of-a-kind piece of functional art. We're proud to say that the Jewel Collection, like all A19 lighting, is handmade in sunny California.

Item # G1D Alladin Wall Sconce

Customize Your Choice

The Jewel Collection allows you to customize our wall sconces and pendants to suit the specific needs of your space. If you're looking for an alternate color combination, give us a call at (800) 664-4204 or email sales@a19.com. We'll work with you to create just the right fixture.

How to Order

To order any fixture from the Jewel Collection, simply choose the item number for the style you prefer and add the code for any desired option.

Damp or Wet

A19's standard light fixtures are cULus listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp."

Wet locations are unsheltered outdoor areas that are exposed to direct contact with rain and require fixtures to be ordered with an "outdoor/wet location" option.

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

Options legend (add code for desired option to fixture item#)

LAMPING OPTIONS	CODE	DESCRIPTION
Standard		E26 base, 100W max or E12 base, 60W max; LED, CFL and Halogen compatible (Bulb not included).
LED	**LEDGU24**	GU24 base, 11W Dimmable Energy Star LED (Bulb included).
Outdoor / Wet Location	**WET**	E26 base, Outdoor Sheltered Socket for Wet Locations (Suitable for rainy locations and open top fixtures. Use WET rated bulb) (Bulb not included).
	WETST-LEDGU24	Sealed Top for Wet Location; GU24 base, 11W Dimmable Energy Star LED (Bulb included).
Diffuser	**DIF**	Functions only to conceal view of bulb from above (on stairs, lofts, etc.) E26 base sockets will be substituted for E12 base. Not suitable for wet locations.

Includes ceramic frame finished in satin white (as shown). See page 62-67 for custom finishes.

The Silhouette Collection

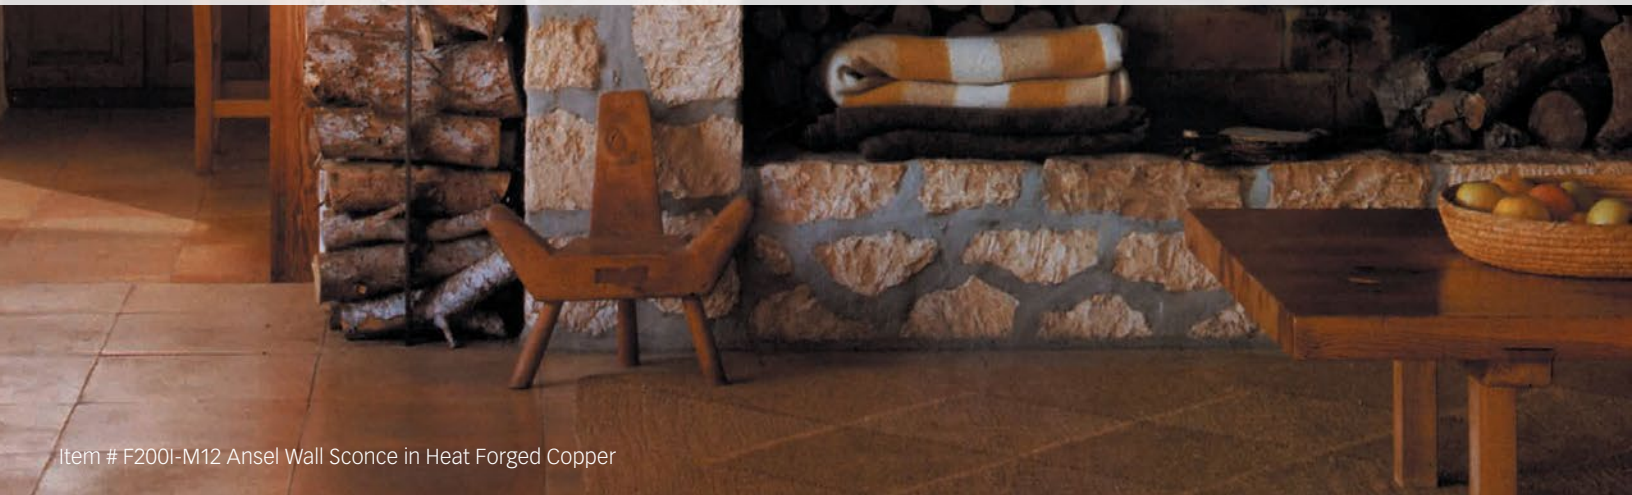
Since ancient times, the art of the silhouette has focused on a person, object or scene in a backlit setting. It's an intriguing technique when you apply it to lighting fixtures, and the ambience that it creates can transform an ordinary room into a designer showcase.

Lighting as art

A19's distinctive Silhouette Collection features intriguing images painted by hand onto the reverse side of a translucent lens. When combined with one of our hand-crafted ceramic wall sconces, the resulting silhouette is breathtaking.

Clever and sensible

A19's Silhouette Collection fixtures are supplied with Energy Star LED lamps and meet ADA building requirements making them a smart choice for public places, themed restaurants, and commercial applications.



Item # F200I-M12 Ansel Wall Sconce in Heat Forged Copper

Customized to your specific needs

We offer flexibility in our Silhouette Collection. Keep the ceramic frame in the standard white finish or choose from more than 65 paint colors, faux finishes or glazes.

Light up your design or logo. Simply email sales@a19.com. We'll work with you to create just the right fixture.

How to Order

To order a wall sconce from the Silhouette Collection, simply choose the item number for the style you prefer and add the code for any desired option or finish.

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

Damp or Wet

A19's standard light fixtures are cULus listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp."

"Wet" means the fixture could be in direct contact with water. For instance, on a patio where rain could fall directly on the fixture, add our sealed top for wet location option (WETST-LEDGU24).

Available in A19's full selection of finishes and custom color matching; see page 62-67.

Picturesque wall sconces framed in ceramic

Item # F200E Konishi Wall Sconce

The Mosaic Collection

For centuries, mosaic has been a respected art that mixes small pieces of colored stone or glass to create beautiful, lasting designs. A19's Mosaic Collection takes this Old World craftsmanship and gives it a modern twist.

Quality that stands the test of time

In addition to their beauty, all of A19's fixtures—including the Mosaic Collection—are manufactured for durability. Because they're ceramic, they're resistant to harsh weather conditions and won't rust or corrode. Additionally, we seal the grout on each mosaic wall sconce and pendant to prevent soiling and make cleaning a breeze.

Unique, handcrafted fixtures

The ceramic process we use to create our Mosaic Collection fixtures means that there will be subtle variations in each piece—it's what makes A19's products unique and why people have continued to buy our products since 1998. We're proud to say that the Mosaic Collection, like all A19 products, is made in America—or as we love to say, in sunny Southern California.

Item # M20302-MU Channels Wall Sconce Multicolor

Customize your choice

The Mosaic Collection allows you to customize our wall sconces and pendants to suit the specific needs of your space. If you're looking for an alternate color combination, give us a call at (800) 664-4204 or email sales@a19.com. We'll work with you to create just the right fixture.

How to Order

To order any pendant from the Mosaic Collection, simply choose the item number for the style you prefer and add the code for any desired option(s).

Damp or Wet

A19's standard light fixtures are cULus listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp."

Wet locations are unsheltered outdoor areas that are exposed to direct contact with rain and require fixtures to be ordered with an "outdoor/wet location" option

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

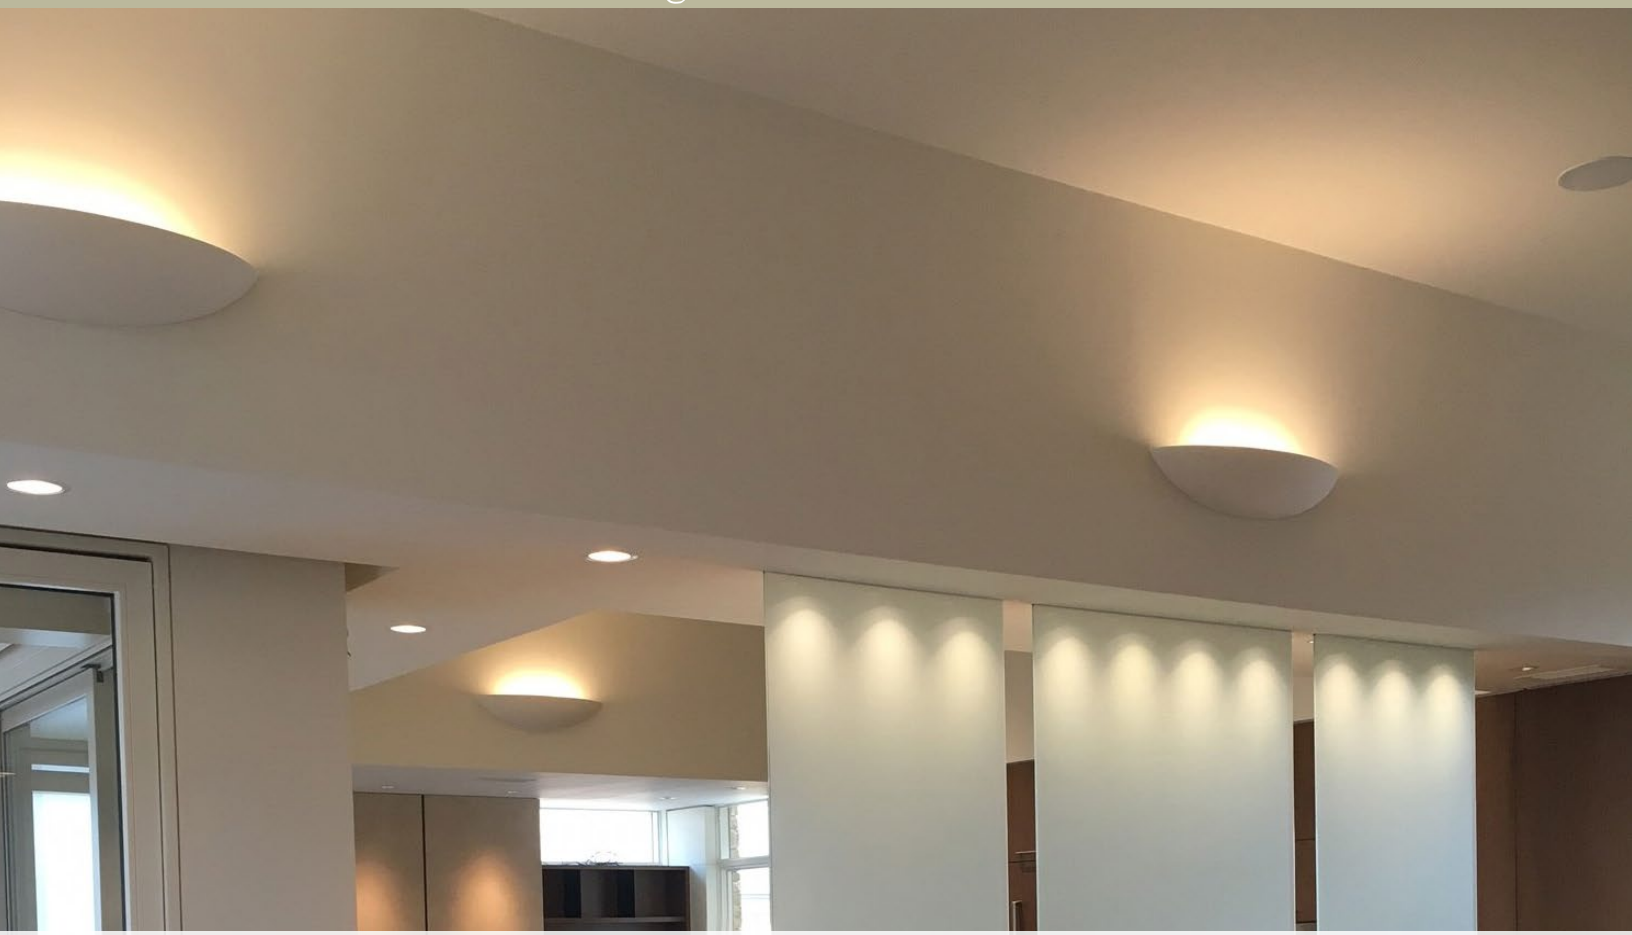
The Islands of Light Collection



Picture yourself in a tropical paradise, relaxing on the veranda, feeling the ocean breeze on your skin and sipping a refreshing drink. That's the inspiration behind A19's Islands of Light Collection. Whether you're looking to create a warm, welcoming atmosphere for a restaurant or want refresh your home, we have a fixture just for you.

Handmade with pride

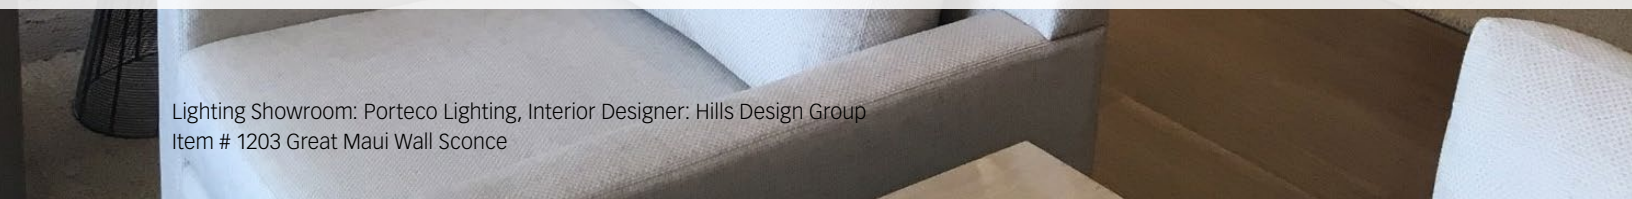
In an age when most products are mass produced and imported, we're proud to say all of A19's fixtures are handmade in sunny California by our own talented artisans. Each piece is designed, molded, fired, sanded, finished, assembled and shipped directly from our studio. Our light fixtures are made-to-order in record speed and are never "out of stock".

Standards compliant

We know building codes and regulations just as much as we know how to create beautiful fixtures. That is why every wall sconce, pendant and corner sconce is made to A19's exacting standards. We offer incandescent options for both damp and wet locations, as well as Energy Star LED options. Additionally, we have ADA-compliant sconces, Dark-Sky measures for light pollution reduction and enchanting down-light effects. All of our pendants include a canopy and seven feet of cord, which can be cut to the appropriate length.

Let your imagination roam

While our hand-made ceramic fixtures are beautiful as is, with A19, you can choose from a large variety signature finishes. And don't stop there—you can specify any color and even dress up your wall sconces and pendants with applied decorations or cutout designs to really stand out from the crowd!



Lighting Showroom: Porteco Lighting, Interior Designer: Hills Design Group
Item # 1203 Great Maui Wall Sconce

Customized to Order

We offer the most flexibility in our Islands of Light Collection. Enjoy the natural bare bisque finish, paint them yourself, select one of our signature finishes, or have us color match to any color of our choosing. We also offer custom lamping configurations to suit your particular project's needs. If you have a specific request or need, give us a call at (800) 664-4204 or email sales@a19.com. We'll work with you to create just the right fixture.

How to Order

To order any wall sconce or pendant from the Islands of Light Collection, simply choose the item number for the style you prefer and add the code for any option(s).

Damp or Wet

A19's standard light fixtures are cULus listed for damp locations. Any location, indoors or out, is considered to be a "damp" location—as long as the fixture is not in direct contact with water. Outdoors under an eave, for instance, would be "damp."

Wet locations are unsheltered outdoor areas that are exposed to direct contact with rain and require fixtures to be ordered with an "outdoor/wet location" option.

ADA Compliance

Fixtures with a depth of 4 inches or less meet the handicap projection requirements set forth by the American Disabilities Act (ADA).

Reducing negative effects of artificial light

Research suggests that light can negatively affect humans and other living organisms. Ceramic is opaque which conceals direct view of the bulb and omits irritating glare. A19's downlights are fully shielded and direct all light downward to minimize sky glow and other forms of light pollution. To reduce the amount of blue light, use warm color temperature bulbs (less than 3000K). For outdoor applications and beachfront property, amber toned or red turtle friendly bulbs are recommended.

Options legend (add code for desired option to fixture item#)

LAMPING OPTIONS	CODE	DESCRIPTION
Standard		E26 base, 100W max or E12 base, 60W max; LED, CFL and Halogen compatible (Bulb not included).
LED	**LEDGU24**	GU24 base, 11W Dimmable Energy Star LED (Bulb included).
Outdoor / Wet Location	**WET**	E26 base, Outdoor Sheltered Socket for Wet Locations (Suitable for rainy locations and open top fixtures. Use WET rated bulb) (Bulb not included).
	WETST-LEDGU24	Sealed Top for Wet Location; GU24 b) base, 11W Dimmable Energy Star LED (Bulb included).
	WETL	Wet Location Label (For Downlights, where the socket is sheltered by the fixture).
Diffuser	**DIF**	Functions only to conceal view of bulb from above (on stairs, lofts, etc.) E26 base sockets will be substituted for E12 base. Not suitable for wet locations.
Pendant Cord & Canopy	**WCC**	White Cord & Canopy (7 ft cord).
	BCC	Black Cord & Canopy (7 ft cord).

Finishes and Decorations

You design it, we make it

At A19, we're not like any other lighting manufacturer. Whether you choose a pendant from our Studio Collection, a wall sconce from the Islands of Light Collection – or any other fixture – you have the choice to customize it to your exact needs.

We offer more than 65 A19 signature choices of high-quality, non-toxic, beautiful paint, faux and glaze finishes and we can color match. Every finish is applied by hand which gives our fixtures a distinctive, artisan look. Even better, our fixtures are durable, long-lasting and able to stand up to some of the harshest weather conditions.

Item # 214-A30 Chios Wall Sconce in Slate Black

Finish

Our clay produces a matte off-white bisque finish when fired. Bare bisque can be cleaned with fine grit sandpaper. You can use our natural bisque fixtures for a clean and simple look, you can paint the bare bisque yourself, or we can apply your choice of finish for you.

Choose from

- A durable professional paint
- An artisan-applied faux finish with an industrial-strength clear coat
- A sumptuous kiln-fired glaze

Options galore

If you're looking for a specific color, you can specify the brand, color and sheen or send us a sample to color match. We even offer custom decorations and cutout motifs. Give us a call at (800) 664-4204 or email sales@a19.com and we'll work with you to create just the right fixture.

How to order

To order any of our fixtures, simply choose the item number for the style you prefer, followed by the code for any desired lamping option, finish and/or decoration.

Item # MP05-A30-BCC Whirl Mini Pendant in Slate Black with Black Cord & Canopy

Glaze Finishes

Are you looking for something glossy, matte or with an irregular organic appeal? Our beautiful glaze finishes can enhance the look of any space, creating a unique, long-lasting and functional piece of art for your home or business.

Giving you a classic, artistic look

Let us customize any Studio Collection shade, Islands of Light fixture, Mosaic Collection fixture or the frames and bodies of the reFusion Collection, Silhouette Collection and Jewel Collection fixtures.

Our glaze finishes are carefully applied by hand and kiln fired to create that classic ceramic look with the subtle color variations that are the hallmark of a truly handmade product.

Solid Acrylic Finishes

From vibrant primary colors to soft pastels or earthy neutrals—and other colors in between—A19 creates gorgeous, durable finishes. You can choose to use any color on Studio Collection Line-voltage Mini Pendants, the entire Islands of Light Collection, or on the frames of the Silhouette Collection.

Professional-grade satin finish

More subtle than a gloss finish, yet with more shine than a matte finish, our painted satin finishes consist of durable, cross-linked, professional-grade acrylic paint that holds up both indoors and outdoors.

If you don't see what you want below, just let us know, and we will precisely match the color you desire.

A1 - Clay

A2 - Straw

A3 - Fawn

A4 - Pearl

A5 - Brick

Faux Finishes

Now you can have the look of leather, rusty metal, stone or exotic wood – indoors or outdoors – without worrying about maintaining it. You can choose to use a faux finish on the entire fixture on any of the Islands of Light Collection, or on the frames and bodies of the Silhouette Collection and the Jewel Collection.

Having fun with faux

The faux finishing begins with our hard-wearing, cross-linked acrylic paint, and is completed by expert artisans for a breathtaking look. A final polymer-based, industrial-grade clear coat adds a silky, satin protective sheen.

With A19, you never have to worry that your neighbors or friends will have the same light fixture because no two faux finishes are ever exactly the same!

Decorations

Add character, texture and interest that will enhance our sconces and pendants even further. Our wide range of decorations look incredible with our solid acrylic finishes and are especially stylish when used with one of our leather faux finishes.

For example, add our antiqued copper "stitching" to any fixture with a perforated border. For a western look, add our star medallion with crossed leather ribbon and copper stitching. Or, select one of our irregular "shard" medallions embossed with a striking image.

Let your imagination run wild – with our decorations, your choices are endless!

D1 - Medallion & Stitching

D2A - Arrowhead Shard & Stitching

D2B - Buffalo Shard & Stitching

D2H - Horse Shard & Stitching

D2M - Mountains Shard & Stitching

D2P - Paw Shard & Stitching

D2S - Steer Shard & Stitching

D2T - Trout Shard & Stitching

D3 - Copper Stitching Only
