

GENERATION LIGHTING

SEA GULL COLLECTION

PRODUCT SHOWN: MELLITA GRANDE EIGHT
LIGHT CHANDELIER IN MIDNIGHT BLACK FINISH

Welcome to Generation Lighting

For over 100 years, we have always held true to delivering beautiful lighting at a compelling value. Our product portfolio has also evolved to serve the needs of today's builders, contractors and homeowners. From space, to function, to style and energy efficiency, we offer complete solutions and are please to present our 2022 Generation Lighting Sea Gull Catalog.

ICON LEGEND

ADA Compliant
Meets the 4" maximum extension requirement of the Americans with Disabilities Act.

Damp Rated
Safety listed for damp location.

Dark Sky
Has 180° light cut-off to minimize light pollution in the night sky.

ENERGY STAR® Qualified
Meets strict energy efficiency guidelines set by the EPA and Department of Energy.

Fluorescent Light Source
Has a fluorescent option.

Integrated LED Warm-On-Dim
LED fixture for which the color temperature warms as the fixture dims.

LED
Has integrated LED or has an LED option.

Mounting Options
These fixtures may: a) mount up or down, b) have a flush or semi-flush option, or c) have configuration options, such as moveable heads or arms. Details are provided in the item description.

New
These fixtures are new launches.

StoneStrong
Constructed with a unique synthetic composite engineered to withstand even the harshest environmental conditions, and backed by a 5-year warranty.

Title 24
Can be used to comply with California Energy Commission (CEC) 2016 Title 24 Part 6 High Efficacy LED Light Source Requirements if used with lamps (not included) that are registered and appear in the CEC Appliance Database.

Title 24
Can be used to comply with California Energy Commission (CEC) 2016 Title 24 Part 6 High Efficacy LED Light Source Requirements if used with included lamps that are registered and appear in the CEC Appliance Database.

Title 24
Can be used to comply with California Energy Commission (CEC) 2016 Title 24 Part 6 High Efficacy LED Light Source Requirements. These fixtures are registered and appear in the CEC Appliance Database.

Title 24
Can be used to comply with California Energy Commission (CEC) 2016 Title 24 Part 6 High Efficacy LED Light Source Requirements. These fixtures are not required to be registered with the CEC nor appear in the CEC Appliance Database (generally fluorescent and outdoor inseparable LED luminaires).

Wildlife Friendly Lighting
When used with lamp S9188, the amber LED @590nM complies with marine turtle safe lighting requirements within coastal regions.

Weighs over 50lbs.
This fixture weighs over 50 pounds and must be supported independently of outlet box.

Wet Rated
Safety listed for wet location.

PRODUCT SHOWN: LOUVER LED HALL LIGHTS IN ANTIQUE BRONZE FINISH

LED STEP & HALL LIGHTING

LED STEP / LED HALL LIGHTING

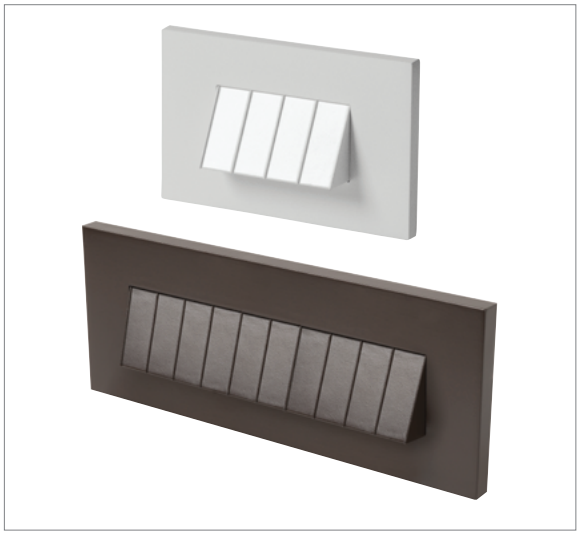
PRODUCT SHOWN: LOUVER LED STEP
LIGHTS IN SATIN NICKEL FINISH

LED Step and LED Hall Lights from Generation Lighting are a perfectly balanced blend of the latest LED light guide technology with the high quality craftsmanship and beautiful design. We've taken expertise from our broad line of task, accent, and undercabinet lighting systems and applied it to a compact form factor to help you make an even bigger impact on the spaces you illuminate.

Extensive use of high quality, die-cast metal and premium finishes ensure enduring aesthetic appeal while being backed by a five-year warranty. Our LED Step and LED Hall Lights come in three finishes, White, Satin Nickel, and Antique Bronze, as well as three different styles, the Louver, the Tarpa, and the Vitra.

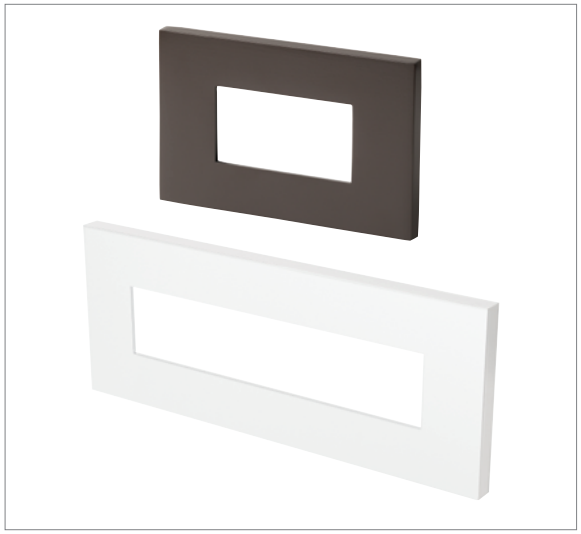
LOUVER

A modern, miniature interpretation of a classic louvered design provides great directional light control



TARPA

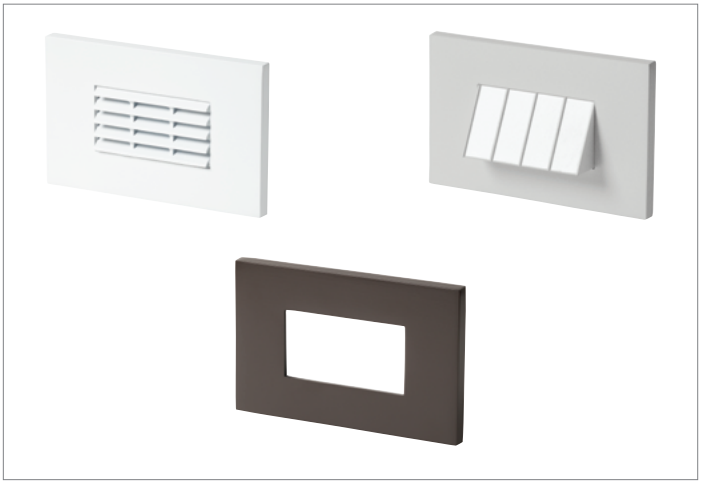
This handsome design inspired by sleek metal awnings deliver ultimate directional light control.

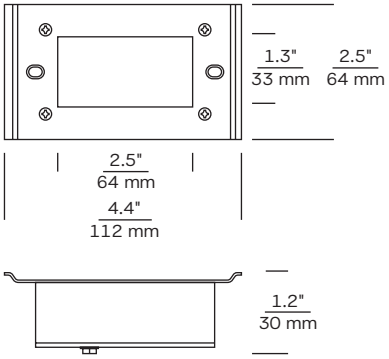


VITRA

A simple, yet sophisticated design that maximizes light output and delivers a clean, crisp aesthetic.

LED STEP LIGHTING





Style	LOUVER	TARPA	VITRA
120V	**93401S(-15 -849 -171)**	**93403S(-15 -849 -171)**	**93405S(-15 -849 -171)**

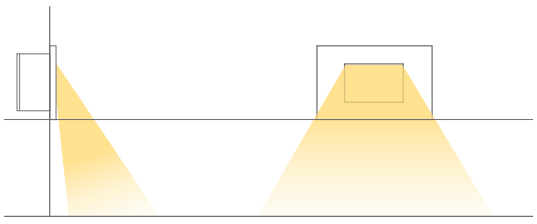
Delivered Lumens	Up to 90		
Power Consumption	3.3w		
Efficacy	36 lm/w		
Color Temperature	3000K		
Color Rendering Index	90 CRI		
Rated Average Life	50,000 hrs to 70%		
Dimmable	Down to 10% with ELV Dimmer (120v, 3000K units only)		
Listings	Suitable for indoor or outdoor installations. cETL and IP-65 WET		
Installation	Installs in a single, 2" x 4", switch box with a minimum depth of 2"		



Light Guide
Generation Lighting LED Step Light housing's light guide throws light in a wide pattern closer to the wall

OPTIMIZED PERFORMANCE

Each housing's LED light guide is purpose-built to push the light down towards the floor at an assertive angle for excellent coverage as close to the wall as possible while throwing the remaining light outward for soft area illumination.

CLOSET LIGHTING

A WEALTH OF APPLICATIONS

Sea Gull is a trusted source for decorative and energy efficient accent lighting. We offer encased Undercabinet lighting, LED Disk Lights, Low-Voltage LED Linear Lighting, and our industry leading LX Cable System. We provide solutions for cove, undercabinet, display, and other accent lighting applications to create layers of lighting and visual interest. Our flexible, long-life LED linear lighting offers maximum flexibility – easy to install on most surfaces and field cuttable to ensure lighting that exactly meets your needs. Our product is certified for residential and commercial applications.

ENCASED UNDERCABINET LIGHTING

PRODUCT SHOWN: VIVID 120V LED 12"

Encased undercabinet lighting is a great supplement to the standard overhead lighting found in most kitchens, offices or retail spaces. At brighter levels it offers extra illumination for key tasks such as food preparation, reading or showcasing product. At lower levels it can be a wonderful accent when you are trying to set just the right mood for entertaining or unwinding at the end of the day.

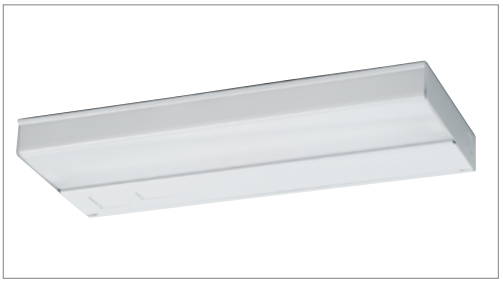
We offer a variety of 120V LED systems to complement any application be it for a residential kitchen or for illuminating shelving in a retail setting. Each system comes in multiple lengths and features quick connects for powering via a wall outlet, knock-outs for hardwiring and the capability to easily link multiple units together.

GLYDE 120V LED

The edge lit Glyde task light combines sleek design and superior technology into one compact unit that is fully dimmable and easy to install and link to other units. Glyde's advanced light guide technology generates a uniform glow of light without the multiple shadows or pixilation seen with other LED task lights. With local on-off switches and convenient plug-n-play design, Glyde can be easily installed without an electrician; just plug the unit into the wall and link as many units together as needed to light your countertop.

VIVID 120V LED

The Vivid LED Undercabinet series takes the classic xenon or fluorescent undercabinet light to the next level. Using high quality LED technology, these fixtures achieve great light output and a high level of energy efficiency at an extremely affordable price point. With local on/off switches and the ability to be dimmed down to 10% these fixtures work well for different activities or times of day. In 2023, we will offer Vivid II as a transition from Vivid I with improved connector cords and updated LED components.



SELF-CONTAINED FLOURESCENT

Self-Contained Fluorescent Lighting is designed with quality and performance in mind. The low profile design is optimal for confined areas. High performance electronic ballasts and T5 lamps provide instant-on, flicker-free light. Contains multiple knockouts for ease of installation and linking units together.

GLYDE 120V LED

GLYDE 120V LED 12"

The edge lit Glyde task light combines sleek design and superior technology into one compact unit that is fully dimmable and easy to install and link to other units. Glyde's advanced light guide technology generates a uniform glow of light without the multiple shadows or pixilation seen with other LED task lights.

LED DISK LIGHTS

PRODUCT SHOWN: LED DISK LIGHTS IN BRUSHED NICKEL FINISH

Disk Lights are convenient and small LED lights that feature a round, circular shape. They are becoming a popular addition to homes by creating a stunning lighting effect within glass-faced cabinets or above small, niche spaces. The compact, low-voltage light offers significant, yet gently diffused light output. Easily connect to multiple connectors to create a beautiful lighting system. Disk Lights' sturdy design enables install as either a recessed or surface mounted fixture based on the application.

Disk Lights are ideal for residential, commercial and retail applications with ample lumen output and versatility. Our Disk Lights are both linkable and dimmable, which allows homeowners to customize lighting as they see fit; available connector lengths include 3", 12", 36" and 72". Sea Gull offers a combination of versatility, safety, energy efficiency and dimmability, making it a smart and practical choice for disk lighting.

DISK LIGHTS

Sea Gull dimmable LED Disk Lights are the perfect solution for taking your accent lighting to the next level. A simple and sleek aluminum body allows these lights to blend in seamlessly with different styles of interior furnishing. The 3000K warm white light will create a comforting and inviting atmosphere in your home without irritating the eye. Our Disk Lights are designed to be extremely energy efficient, consuming only 3 watts per light and providing 90 CRI and 250 lumens output. Available in three finishes: White, Black or Brushed Nickel with an acrylic diffuser. Disk Lights are perfectly suitable for use in cabinets, closets, under counter, bookshelf, media center, etc. You can link up to 20 disk lights per run and with no bulbs to change and maintenance-free operation, expect reliable use for years to come.

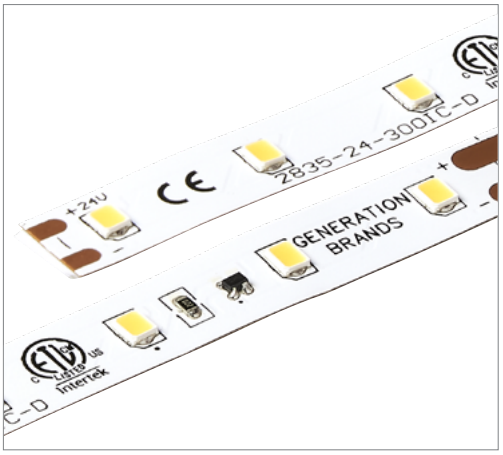
120V plug in transformer, 12V DC 1 Amp output for use with USB C connectors.

984201S(-12 -15)
Maximum of 8 disks

LED LINEAR TAPE

PRODUCT SHOWN: JANE LED TAPE

Small form factor, linear task and accent lighting is critical in residential and commercial spaces to layer light and create visual interest while placing light exactly where it is needed. LED Tape and Channels are often placed near a surface – frequently a white or light-colored surface which tends to pick up LED color variances adjacent to each other. We are proud to offer high color quality and consistency across our LED Tape and Accent Lighting lineup.

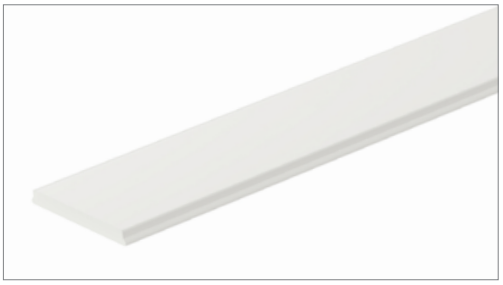


JANE LED TAPE

Jane LED Tape is perfect for a wide range of indoor applications where space is limited. Its low-profile design and flexibility allow for discrete installation in spaces like under cabinets, cove ceilings, toe-kicks, in cabinets or even in drawers. Jane 200 features high quality LED diodes that meet a stringent three-step binning threshold for maintaining a consistent color of light across an entire run.

EXTRUDED CHANNELS

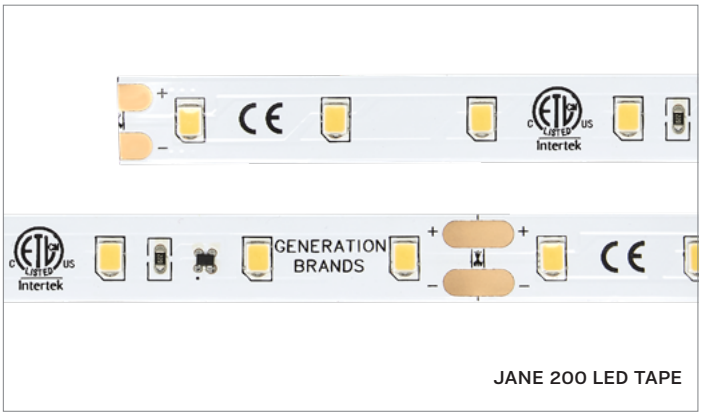
When space allows, create an Extruded Channel, by simply fitting Jane LED tape into 4' sections of polycarbonate track. For maximum flexibility, our track can be cut to size in the field. It mounts flat or at a 45-degree angle using screws or double-sided tape. The track is available with a flat, frosted lens to protect Jane LED tape and reduce pixelation while providing a wider beam of light.



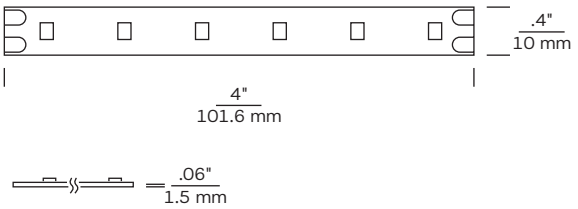
EXTRUDED CHANNEL LENS

Flat, frosted lens for use with extruded channel to protect Jane 200 LED tape and reduce pixelation while providing a wider beam of light. Sold separate from extruded channel.

JANE LED TAPE



JANE 200 LED TAPE



Jane 200 features high quality LED diodes that meet a stringent three-step binning threshold for maintaining a consistent color of light across an entire run.

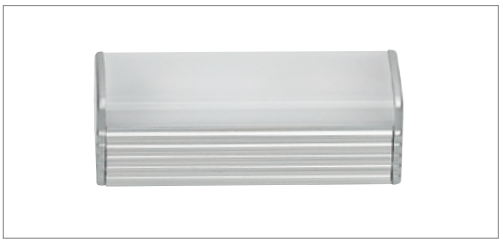
LX CABLE SYSTEM

PRODUCTS SHOWN: LED FESTOON (OBSCURED)

The Generation Lighting LX Cable System is our premier lighting solution giving users the utmost flexibility to easily design and install customized lighting to meet the specific needs of their space. Simply identify the length of run for which you will need cable, choose the lamping modules best suited for your application, and select a transformer.

Our LX Cable System is uniquely engineered so that you can mix and match any of our lamping modules on the same system. The snap-on design enables quick installation and the ability to adjust over time as lighting needs or preferences change.



HIGH OUTPUT LED MODULES

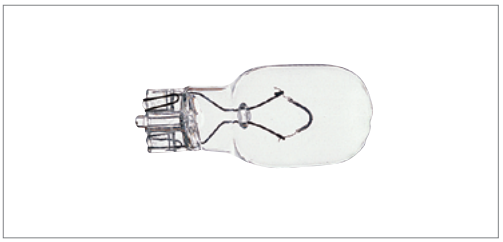
The miniature, High Output LED Modules can be used with 12v Generation Lighting LX Cable Systems powered by magnetic low-voltage or electronic low-voltage transformers.

LED FESTOON

Upgrade to our LX LED Festoons from our 5w Xenon Festoons and realize an energy savings of over 80% without compromising light output. LX LED Festoons snap into LX Festoon Lampholders (sold separately), making retrofitting of existing systems easy.

XENON FESTOON

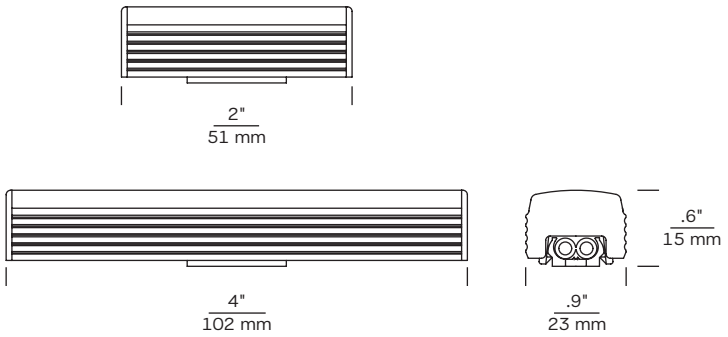
Generation Lighting LX Xenon Festoons revolutionized the under cabinet lighting industry and continue to be an industry standard.



WEDGE BASE

LX Wedge Base Lamps provide illumination for a varied list of applications. LX Wedge Base Lamps add another level of versatility to Generation Lighting LX Cable systems.

HIGH OUTPUT LED MODULES



Simply snap the LED modules onto LX track and cable to provide a generous amount of illumination without the need for a lampholder. These high intensity LED modules utilize wider recommended spacing than our festoons while still providing even surface illumination.

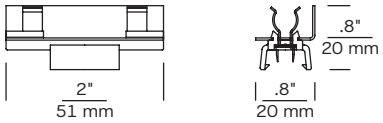
FESTOON LAMPHOLDER

For use with our highly specified LED and Xenon festoons, Generation Lighting LX Festoon Lampholders feature a high quality reflector and base for directing light where you need it. Our Accent Task Socket for general applications provides crisp linear lighting. Each lampholder snaps onto LX Track and Cable with ease and can be spaced based on your criteria.



Item Numbers	9830(-15 -12)
Reflector	"L" ACCENT TASK SOCKET
Voltage	12V AC
Lamp Base	FESTOON
Certification	CETL DAMP
Maximum Wattage	(1) 10W XENON FESTOON (1) LED FESTOON
Recommended Minimum Spacing	2" ON CENTER (5W XENON) 4" ON CENTER (LED FESTOON)
Material	HEAT RESISTANT POLYCARBONATE BASE AND ANODIZED ALUMINUM REFLECTOR

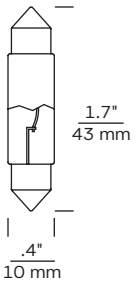
[1] LX LED Festoons are dimmable on magnetic and electronic low voltage systems. For magnetic systems, a standard incandescent or magnetic low voltage (MLV) dimmer can be used. For electronic, an electronic low voltage (ELV) dimmer is recommended.

Lamps in chart above only compatible with Festoon Lampholder 9830.

APPLICATION GUIDE

Application	Recommended Spacing on Center	Suggested Lamp Source(s)
Above Cabinet	6" - 12"	LED FESTOON
Under Cabinet	2" - 6"	LED FESTOON
Inside Cabinet	1 - 2 PER SHELF	LED FESTOON
Toe Space	4"	LED FESTOON
Showcase	4" - 6"	LED FESTOON
Cove	2" - 6"	LED FESTOON

XENON FESTOON



Xenon Festoon are available in 5w and 10w. Our directional lampholder easily positions light where you need it (lampholder sold separately).

Item Number	97118(-32 -33)	97119(-32 -33)
Color Temperature	2550K	2650K
Voltage	12V AC	12V AC
Rated Watts	5 WATTS	10 WATTS
Finish	CLEAR (-32), FROSTED (-33)	
Gross Lumens	33	83
Power Consumption	4.2W	8.4W
Efficacy	8 LM/W	10 LM/W
Color Rendering Index	>90 CRI	
Rated Average Life	16,000 HOURS	12,000 HOURS
Dimmable	YES	
Lamp Base	FESTOON	
Recommended Spacing	4" ON CENTER (1" MINIMUM SEPARATION)

SELECT ACCESSORIES

A. TRACK
Noryl® track to support cable and lampholders. Use double faced tape (9450), track clip (9438) or screws (9862) through pre-drilled holes to attach track to surface. Track may be flexed, notched, curved and easily cut for various applications.

9435(-15 -12)
L: 48" W: .5" H: .25"

B. TRACK WITH FASCIA PANEL
One piece Noryl® fascia panel with integral track to support cable and lampholders. Use under shelves or where system cannot be hidden behind a lip on cabinets. Track/fascia may be easily cut to various lengths. Use double faced tape (9450) track clip (9438) or screws (9862) through pre-drilled holes to attach track/fascia to surface. Use double-faced tape on glass and other smooth surfaces.

9443-12
L: 48" W: .5" H: .25"

C. TRACK CLIP
Polycarbonate track mounting clip. Easily snaps on at any point along 9435 track or 9443 track/fascia panel to secure to surface. Space clips according to weight of fixtures, to prevent track from sagging. Includes .375" long #4 screw.

9438(-15 -12)
L: 1" W: .75" H: .343"

D. INDOOR CABLE SPOOL
Spools of cable especially designed with easy piercing, self-sealing insulation over stranded copper wire for use with Generation Lighting LX Cable Lighting system. Markings for lampholder placement every 2". Designed to be mounted in Generation Lighting LX Track. LX 10/2 AWG 105° C cable is rated for indoor use only. Maximum wattage per length 300w at 12v; 600w at 24v cable is not rated to run behind walls. Check with local codes.

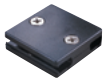
9471(-15 -12)
L: 100' W: .375" H: .187"

9470(-15 -12)
L: 50' W: .375" H: .187"

9469(-15 -12)
L: 25' W: .375" H: .187"

E. MINIATURE WIRING COMPARTMENT / SPLICER
Polycarbonate splicer with cover for connection between transformer extension Wire (i.e. Romex) and low voltage cable, or LED Tape Connector. Maximum 25 amps.

9459(-15 -12)
L: 2" W: .968" H: .625"



F. TAP OFF CONNECTOR
Polycarbonate tap off connector. Use to tap off of low voltage Generation Lighting® Cable and create a parallel run for shelving, etc. Corrosion resistant contacts pierce the specially designed Generation Lighting® cable for electrical connection. Listed 12v and 24v. Wet location 12v only. Maximum wattage after connection on 105˚C Generation Lighting® tap cable: 200w at 12v; 375W at 24v.

9380(-15 -12)
L: 1.5" W: 1.5" H: .437"

G. FUSED PLUG
For powering multiple Generation Lighting low voltage luminaires from an LX Cable System. See page "Technical Information" for detailed wiring information.

9488-12
L: .875" W: .75" H: .812"

H. WIRING COMPARTMENT
Steel wiring compartment with hole for .5" conduit connector, snap on cover and opening for track and cable. Includes terminal block for connection between transformer extension Wire (i.e. Romex type) and low voltage cable. Maximum 25 amps.

9481-15
L: 2" W: 1.312" H: 1.25"

I. CHANNEL SCREWS
⅜" long #4 Phillips flat head screws for securely mounting LED extruded channel.

9862

J. DOUBLE FACED TAPE
Specially designed "High Adhesion" 3M™ double-faced tape for use with LED extruded channel. Allow minimum 24 hours curing of adhesive prior to applying power to the circuit.

9450
L: 25' W: .375" H: .031"

SELECT POWER SOURCE

A. MAGNETIC TRANSFORMERS
Include boost tap for use when transformer is located 20' or more from first light.

L: 8.385" W: 2.53" H: 1.219"

TRANSFORMERS

Generation Lighting power supplies deliver consistent, reliable energy, extending the life and quality of our lighting fixtures. Technical information, dimmer compatibility, as well as maximum run lengths are listed in the following section.

MAGNETIC TRANSFORMERS

Magnetic transformers are encased in a powder coated metal enclosure that is potted to minimize noise and vibration. All are UL/cUL listed, NEC 411 approved, thermally protected, dimmable, and have resettable magnetic circuit breakers for short circuit protection. Housings feature easy-hang bracket, wiring access door, and knockouts for line voltage entry.

ELECTRONIC TRANSFORMERS

The zero-load electronic transformers from Generation Lighting provide industry leading technology in a small form factor. All transformers now include radio frequency interference modules to eliminate interference that can occur when dimming low-voltage fixtures. These units also have the added benefits of local on/off switches and a user replaceable secondary side of the transformer that can be swapped without an electrician or even needing to touch the primary wiring.

Generation Lighting has revolutionized the world of recessed downlights with our Traverse line of LED-light modules. The Traverse lineup does more than just eliminate many of the LED pain points that used to turn off consumers. It also provides you with one-stop shopping, courtesy of six different downlight options that provide superior performance and value at various price points.

Generation Lighting Traverse downlights feature advanced technology that enhances job-site productivity and efficiency with quick, easy installations. At the same time, they provide consumers with eye-pleasing, long-lasting, energy-efficient and more cost-effective LED lighting solutions. In short, the Traverse line is exactly what you'd expect from Generation Lighting, which has dominated the LED-lighting market for the last decade.

TRAVERSE FLEX

FEATURES & BENEFITS

· Designed for superior performance and value
· Economical, longer lasting alternative to standard recessed downlights
· Provides visually pleasing, color accurate illumination (90 CRI)
· Easy to install: uses mounting ring, trim snaps into ring with springs
· Standard 120V lighting fixture
· Mounts to 4" junction boxes, including pancake junction box
· ENERGY STAR® qualified
· Title-24 Compliant
· Wet rated for shower ceiling installations
· Dimmable down to 3%

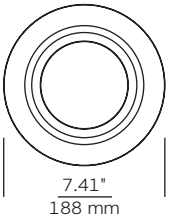
TRAVERSE LYTE

TRAVERSE LYTE



FEATURES & BENEFITS

- Designed for superior performance and value
- Economical, longer lasting alternative to standard recessed downlights
- Provides visually pleasing, color accurate illumination (90 CRI)
- Easy to install:
  - Standard 120V lighting fixture
  - Mounts on all standard junction boxes, including pan junction box
- Retrofits into most common recessed lighting housings with optional Edison base adapter (5" and 6" uses part #14795)
- ENERGY STAR® qualified
- Title-24 Compliant
- Wet rated for shower ceiling installations
- Dimmable down to 5%

LUCARNE LED NICHE LIGHTS

PRODUCT SHOWN: LUCARNE ROUND
ADJUSTABLE DOWNLIGHT IN WHITE FINISH

The Lucarne LED niche lights from Generation Lighting combine a compact size with advanced LEDs to provide superior quality light from a small package. Available in fixed or adjustable downlights, each of these units feature 90 CRI in your choice of 2700K or 3000K and are available in either 12 or 24 volts. For maximum flexibility, each light ships with both a 30˚ or 65˚ beam spread lens included so you can adjust as needed during installation or easily reconfigure at a later date.

Lucarne LED Niche Lighting is a versatile accent lighting option for your home or commercial space. With multiple color temperatures and beam spread options available you can customize your installation to direct light where and how it is needed. For highlighting objects, drawing attention to architectural details and improving overall illumination indoors or out, Lucarne Niche Lights adds a designer's touch.

With a choice of two finishes, these niche lights are easy to place in virtually any setting. Whether you are looking for accent lighting to draw attention to architectural details of a space, wanting to highlight items on display, or just provide an additional layer of lighting to a room, the Lucarne LED Niche lights provide you the ultimate flexibility and level of illumination.

Max Run: 35 ft.

B. MAGNETIC TRANSFORMER

UL/cUL Listed. NEX 411 approved, thermally protected, dimmable and have resettable magnetic circuit breakers for short circuit protection. Housings feature easy-hang bracket wiring access door and knockouts for line voltage entry. Include boost tap for use when transformer is located 20' or more from first light.

94461-12
L: 10.75" W: 4.5" H: 4.25"
Wattage: 250w
24v single output
Max Run: 35 ft.

RECESSED HOUSING

PRODUCT SHOWN: 6" HOUSING WITH OPEN SHOWER TRIM IN WHITE FINISH

Selecting the right recessed housing begins with knowing the Installation method as well as understanding how the space will be used. The guide below will help you with the process of selecting your housing.

REMODEL OR NEW CONSTRUCTION

A "remodel" Installation typically is an existing room project where the Installation is made by cutting through existing ceiling materials. The housing will not be supported by joists but by the ceiling material, such as drywall.

A "new construction" project is one that has access to the ceiling and joists; where insulation and drywall are not yet installed. New construction housings are nailed directly into the joists with adjustable bar hangers.

IC OR NON-IC HOUSING

IC (insulation contact) housings can come in direct contact with insulation materials. Insulation should not be compressed.

Non-IC (no insulation contact) housings are for areas without insulation or where insulation can be kept a minimum of 3" away from housing.

SIZE OF HOUSING

4" housings are designed for a smaller, sleek look in your ceiling. Best used in smaller spaces for a minimal look.

6" housings are for the standard large aperture approach in your ceiling. Can be used in tall entryways and two-story hallways or high ceilings.

ADDITIONAL CONSIDERATIONS

AIR-TIGHT HOUSINGS are sealed to prevent air from escaping into the ceiling / floor above; a benefit to heating /cooling efficiency.

A RECESSED TRIM is the "ring" blending the recessed housing, lamp and ceiling material into a clean finish.

A BAFFLE is the cone-like piece that surrounds the inside of the housing around the bulb; they can be smooth or ridged and help shape the light and minimize glare.

RESOURCES

ELECTRONIC TRANSFORMERS

Electronic transformers range in size from single output 60W (Class II), single output 150w zero-load, and single output 150w (Class I). Our transformers run quiet, are instant-on, feature fire-rated housings and dim easily with electronic low-voltage (ELV) dimmers. Generation Lighting Electronic Transformers specify whether they have a minimum load requirement — starting at 15w — or whether they are zero-load capable. Zero-load transformers have been designed for the low wattage draws of LED technology. For proper operation of an electronic transformer, the wattage load must fall within the specified range. Generation Lighting Electronic Transformers are moisture and shock resistant, featuring soft start circuitry for increased lamp life. Electronic transformers, as with many electronic components, may cause radio frequency interference (RFI). Our Electronic Transformers have built-in filters to help eliminate RFI. Should RFI be noticeable, rotate the unit to change the direction of the electronic field or replace with a magnetic transformer, which will not cause RFI.

MAGNETIC TRANSFORMERS

Generation Lighting laminated magnetic transformers are core and coil, isolated type transformers. We offer several sizes of laminated magnetic transformers ranging from 75 to 300w at 12v, and 60 to 200w at 24v in either AC or DC. Each transformer features thermal protection on the primary (120v) side. Our laminated magnetic transformers have resettable thermal circuit breakers on the low voltage side. Other features include a faraday shield, potted and encased core and coil for added safety and ease of installation. A boost tap is integrated to single-tap magnetic transformers to compensate for voltage drop. For optimum operation we recommend the load on all laminated magnetic transformers be between 50 and 100% of the rated wattage when used with xenon and halogen light sources. Magnetic transformers are zero load with LED lamp source. Not meeting minimum recommend loads can overdrive luminaires and greatly reduce lamp life. Be sure to keep insulation away from transformers. Magnetic transformers should be mounted vertically. If the transformer must be mounted horizontally, the ambient temperature must be below 120°F and the maximum load should be reduced to 80% of output.

OPERATING TEMPERATURES

Generation Lighting systems require adequate ventilation to dissipate heat generated during their operation. Care must be taken to avoid installing the system in confined areas where excessive heat may result in the transformer circuit breaker tripping or causing damage to the system and/or the area being illuminated. Surface temperatures on transformers, wiring and luminaires must not exceed 90°C (194°F).

DIMMING

When dimming a low-voltage system, it is recommended that the dimming occur on the primary side of the transformer, reducing the power coming into the transformer. The dimmer must be matched to the type of transformer that's powering the system.

- For electronic transformers use an electronic low voltage (ELV) dimmer.
- For magnetic transformers use a standard, incandescent line voltage dimmer or a magnetic low voltage (MLV) dimmer.

REMOTE MOUNTING

When a transformer needs to be mounted in a remote location, a properly sized jumper Wire (the cable between the transformer and the start of the lighting run, or between two illuminated sections) must be used. The jumper Wire can be Generation Lighting Cable run in additional protection (9435 track and 9439 cover or listed conduit), Romex or Type AC. Be sure to check with your local electrical inspector. The jumper Wire and lighting run must be connected in an approved wiring compartment, such as 9459 (-xx) or 9481 (-xx).

POWERING SYSTEMS

We recommend all systems used with Generation Lighting Systems be powered on the line voltage (120v or primary) side of the connection for optimum performance and safety. For applications which require operating to be done on the low voltage (secondary) side of the connection, there are two factors which need to be considered:

- It is very important that the switch used is rated for the amperage created; and
- Meet minimum load on electronic transformer To calculate amperage, use the following formula: Amperage = Wattage / Voltage

VOLTAGE DROP

Voltage drop is the difference between voltage of luminaires close to the transformer and luminaires at the end of an illuminated section.

- All lamp sources function optimally with no more than 10% voltage drop. Voltage outside of this range will affect lamp life and overall performance.
- To compensate for voltage drop, please calculate as stated below and use appropriate Wire.

CALCULATING VOLTAGE DROP:

Step 1:

Amps (Watts/Voltage) x Run/Length x 2 (for AC circuit) x Resistance per Foot(1) = Voltage Drop (in Volts)

Step 2:

- For 12v systems add voltage drop to 12 to determine tap to use.
- For 24v systems add voltage drop to 24 to determine tap to use.

RESISTANCE PER FOOT CHART

* When dimming LED light sources, derate your dimmer to 25% of its rated capacity. For example, a 600 watt dimmer should be derated to 150 watt capacity. Consult your dimmer manufacturer for more information and restrictions.

CHAIN & STEMS

TO ORDER ADDITIONAL CHAIN OR STEMS:

1. Locate the row for your collection and fixture.
2. Write down the style number in the Chain or stem column.
3. Replace the "xxx" with the desired finish code from Finishes Available column.

THINGS TO NOTE

Finish representations in this catalog are shown using high resolution digital reproduction, and while every effort has been made to render colors accurately, some may vary slightly from the actual product, especially hand-painted finishes due to the nature of hand craftsmanship.

Light bulbs are not included with lighting fixture products shown in this catalog, unless otherwise noted. Generation Lighting reserves the right,at any time to make changes in the construction and design of products listed without notice. The changes may be necessary by law or the availability of supplies.
