Standard Frame Colors

Suncoast frames are prepared using our exclusive multi stage Platinum Bond™ finishing process. Platinum Bond™ incorporates state of the art equipment and techniques with powder coat finishes. The process begins with hand sanding and inspection of each frame which then enters our automated multi stage pretreatment system. The proprietary chemicals in this system etch the aluminum, providing a corrosion resistant chemical bond between the frame and the finish. After each frame is coated with Platinum Bond™ powder coating, your furniture will travel along our automated high tech finishing conveyor line and through our specially constructed curing ovens where the powder is mechanically fused, and bonded to the aluminum frame yielding a thick, rock hard finish tailored for outdoor use. Suncoast warranties our Platinum Bond™ finish for 3 years.

Arctic White (AW)

Reasons to Select Suncoast

Suncoast's furniture is handcrafted in the U.S.A. combining the finest materials, the latest manufacturing techniques and skilled craftsmanship. From design to finished product, Suncoast's goals of comfort and durability are achieved.

Quality Platinum Bond™ Finish
Frames are prepared using our exclusive Platinum Bond™ finish process consisting of two coatings of polyester powder. This finish will not rust or peel, is three times thicker than paint and more durable.

Quality Aluminum Swivel Mechanism & Stainless Steel Hardware
Two fiberglass springs attached to an aluminum mechanism provides a smooth rocking motion, and aluminum doesn't rust. Only stainless steel nuts and bolts are used where movement is desired, these will never rust or become wobbly like other fasteners.

Comfort Is Designed Into Every Frame
Our designs feature a gentle curve in each chair back, ergonomically designed to provide lumbar and shoulder support for comfortable seating.

Comfortable Cushions
Constructed with thermal bonded polyester fiber to provide maximum comfort, firmness and resilience. Only the highest quality materials available are used in the sewing and construction.

Individual Comfort & Style
Six seating styles: Cast, cushion, sling, basket weave, wicker and strap, all designed to provide comfort, and to suit a variety of preferences.

Comfortable Strap Spacing
11 Straps on the high back chair – the most in the industry, this provides unsurpassed comfort. Suncoast uses 2" wide x 1/8 inch thick, 100% virgin vinyl straps with ultraviolet stabilizers and mildew inhibitors, for longer lasting colors and greater mildew resistance.

Durability, Built Into Every Frame
Aluminum frames, built to last. Unlike many manufacturers, we use heavy gauge extrusions in special configurations to increase strength and enhance the design.

Durable Heli Arc 360 Degree Weld
Hand welded with our special heli arc equipment, welds are full circumference, ensuring years of carefree enjoyment.

Double Wrap Vinyl Straps
To eliminate strap pull out, straps are permanently held in place by nylon rivets covered by a full double wrap of strap at each end.

Double Sewn Slings
Double stitched slings lock together the outer vinyl jacket of each fabric strand and lock the inner acrylic core, making slings more durable and longer lasting

Customized Frames & Fabrics
A wide range of colors and fabrics allow you to customize your furniture, to compliment your decor. See your authorized dealer to view our complete selection of frames and fabrics.
