

LAFER[®]

RECLINERS

US Stocking Program 2019

the original **LAFER** recliner

The current generation of Lafer recliners, designed by Percival Lafer, was born from the idea of making a recliner with a hidden footrest. This idea was researched and developed resulting in a complete reclining chair solution that is both beautiful and ergonomic. And now after more than 20 years in production, the Lafer recliner concept remains authentic and original.

Lafer recliners are your perfect solution for a beautifully functional reclining chair. Lafer's patented reclining system is ergonomic and space saving, providing you the ultimate luxury—style and comfort. Independent controls for the backrest, footrest, and headrest enable your Lafer recliner to adapt to your body for total relaxation whether you are sitting, laying down, watching TV, reading a book, or sleeping. Every recliner is made in Brazil with a durable steel frame and top grain leather for a superior quality product that is both relaxing and environmentally friendly.
