WEPLIGHT

In 2001, designer Marcelo Dabini created WEPlight, a sustainable, real wood lighting fixture. The pure beauty of the wood grain ensures the unique quality of each shade. Every fixture has such a unique character that it is nothing short of art.

Handcrafted Design

The natural characteristics of the wood inspire each WEPlight shade. From the hearts and souls of the designers, each light shade is made from nature, with time-honored techniques.

Sourcing only local Argentine reclaimed wood, WEP Light streamlined production to ensure sustainability, with each fixture made to order. By minimizing material waste, WEP has nearly eliminated its environmental footprint.

Wool Acoustic

WEPlight colors are based off Le Corbusier's Architectural Polychromy. All the shades are naturally balanced and meant to be combined in any configuration. The colors Rose, Pale Green, Terracotta, Petrol Blue, Ocher, and Violet marry perfectly with the natural wood feel of each WEP lighting fixture.

“The history of architecture is the history of the struggle for light.”- Le Corbusier
