- POLE: 1.375" / 35mm

STYLE: VALANCE/NO VENT
 W: ASH WOOD / POINTED BOTTOM
 AP: ALUMINUM / POINTED BOTTOM

Umbrella clearance dimensions are measured while on a solid surface or mounted in a base. Beach umbrellas are meant to be anchored in the sand, and depending on the depth planted, this dimension will change. All dimensions have a +/-5" tolerance based on multiple variables; pin placement height, crank tautness and fabric weight.

FRAME FINISHES

Place the pointed bottom pole at least 12"-18" into the sand. Pack the sand around the pole for maximum stability.

FEATURES

Superior 5mm steel ribs are supported by a 1.3mm thick aluminum center and pointed bottom pole or a solid ash wood center and pointed bottom pole.

The 1.375" diameter solid ash wood center pole is a long grain wood providing flexibility, strength and durability in the coastal salt air atmosphere.

Stainless steel spring ledge provides a smooth, easy open. **(Ash Wood Pole)**

The "EZ-Up" spring activated steel ledge provides a smooth, easy open. **(Aluminum Pole)**

Non-twisting end tips won't tear through the fabric, or become loose, ensuring the canopy will always look its best.

Choose from 9 oz. marine grade acrylic fabric, or heavy gauge vinyl.

Maintenance free stainless steel hardware.
