

LLOYD FLANDERS®

WOVEN FOR LIFE

2021

Great furniture is not woven
to fill spaces in the home.

It is woven
for the spaces in our lives.

It is woven for laughter,
and for family.

It is woven for romance,
and for quiet contemplation.
It is woven for rest, and for play.

We believe great design,
craftsmanship, and life-long
durability are all intertwined.

That is why our furniture
has become a part of so many lives.

Made in America

In 1917, Marshall B. Lloyd patented a process of weaving cellulose strands into wicker fabric. Lloyd Flanders® has advanced the original technology producing a continuous strand that will not burr, crack, or peel resulting in a consistently smooth weave. Each strand in the fabric's warp is constructed of twisted cellulose fibers immersed in glue to prevent unraveling. In the weft, the strands are reinforced with aluminum wire for added strength and resilience. Following the weaving process, the wicker is completely submerged in a resin emulsion and baked to form a flexible coating which provides additional protection from moisture. The wicker is then contoured over a sturdy aluminum frame and is completed with our special Durium® finish ensuring years of use. This innovative manufacturing process allows Lloyd Flanders® to produce wicker furniture that is both versatile and durable. Coupled with upscale design and stylish comfort, it has quickly become the most sought-after all weather wicker furniture available today.
