Reticulated Foam CUSHIONS

Most of our cushions are offered in a reticulated foam core option. The reticulated foam allows for easier water drainage, reducing drying time. The reticulated foam core has a density rating of 1.8 and an indentation load deflection of 30. This combination allows for a very comfortable sit.

Standard CUSHIONS

Our Standard Cushions are composed of bonded fiber layers on top of polyurethane foam, making them exceptionally comfortable. The ratio of foam to fiber is 50% to 50% once core is inserted into the fabric cushion slip.

Dream CUSHIONS

Dream Cushion™ by Summer Classics offers 1.8 density high resilient and California Fire Rated Foam for maximum comfort. Our woven, water-resistant jacket features a "pillow top" of blown-fiber channels providing the utmost quality and softness. Soft, durable, and water-resistant, this is truly the perfect cushion.
